Geomagnetism

Electromagnetic induction in a non-horizontally stratified two-layered conductor, *F. W. Jones* 17
The general theory of electromagnetic induction in a conducting half-space, *J. T. Weaver* 83
Magnetometer array studies in the north-western United States and south-western Canada, *P. A. Camfield, D. I. Gough & H. Porath* 201
Some results on the magnetic field of electric currents induced in a thin hemispherical shell of finite conductivity, with geomagnetic applications, *S. S. Doss and A. A. Ashour* 385
The magnetic field of a plane current sheet with different uniform conductivities in different parts with results for an elliptic area, *Attia A. Ashour* 401
Electromagnetic induction in thin finite sheets having conductivity decreasing to zero at the edge, with geomagnetic applications, *Attia A. Ashour* 417
Magnetotelluric studies across the Tasman Geosyncline, Australia, *H. Y. Tammemagi & F. E. M. Lilley* 505

Gravity

Bouguer anomaly map of the North Celtic Sea and entrance to the Bristol Channel, *F. J. Davey* 277
The La Coste suspension—Principles and practice, *Ben S. Melton* 521
The elimination of cross-coupling errors in systematic sea gravity surveys, *R. T. Haworth* 545

Letters to the Editors

Displacement at the centre of the Earth induced by an earthquake or an underground explosion, *Sarva Jit Singh* 117
Reply by the authors to ' Palaeomagnetism of the Lisbon volcanics: A discussion of a recent paper by N. D. Watkins and A. Richardson ' by K. M. Storetvedt, *N. D. Watkins & A. Richardson* 446
Proposed international system unit of gravitational acceleration, *W. I. Reilly* 449
Inventory of marine geological geophysical data coverage—C.M.G., *T. F. Gaskell* .. 451

Oceanography

Current velocity profiles in a tidal channel, *K. R. Dyer* 153

Palaeomagnetism

Palaeomagnetic studies of the Caerfai Series and the Skomer Volcanic Group (Lower Palaeozoic, Wales), *J. C. Briden, J. Irons & P. A. Johnson* 1
Palaeomagnetism and potassium–argon ages of volcanic rocks of Ngorongoro Caldera, Tanzania, *C. S. Grommé, T. A. Reilly, A. E. Mussett and R. L. Hay* 101
Palaeomagnetism of cretaceous dikes from Jamaica, *N. D. Watkins & F. W. Cambray* .. 163
The sensitivity of the conglomerate test in palaeomagnetism, *J. Starkey & H. C. Palmer* 235
The relation between chemical analysis and mineralogy of oxidized titaniferous magnetites in some Scottish dolerites, *C. Unan* 241
Calculation of parameters for the astatic magnetometer, *Yilmaz İspir* 285
Dipole offset—the time-average palaeomagnetic filed over the past 25 million years, *R. L. Wilson* 491
Intrusion and magnetization of the Giles Complex, Central Australia, *R. A. Facer* .. 517

Research Notes

Excitation of the normal modes of the Earth by earthquake sources, *Freeman Gilbert* 223
A comment on 'Statistical estimates of amplitude and phase corrections', *F. J. Lowes* 227

Seismology

Surface wave dispersion and crust structure in Greenland, *Søren Gregersen* 29
Short period spectral discriminants for explosions, *William H. Bakun & Lane R. Johnson* 139
SH waves in a transversely isotropic medium—III. Transradially isotropic sphere, *R. Sato, E. R. Lapwood & Kehar Singh* 181
A revised travel-time table for *S*, *M. J. Randall* 299
On regional differences in dispersion of mantle Rayleigh waves, *Adam M. Dziewonski* .. 289
The predominant frequency of stress waves in non-elastic zone near an explosive source, *V. Schenk* 347
Source parameters of earthquakes from spectra of Rayleigh waves, *Agustin Udias* .. 353
An elasticity theorem for heterogeneous media, with an example of body wave dispersion in the Earth, *Paul G. Richards* 453
Seismic study of an oceanic ridge earthquake swarm in the Gulf of California, *Wayne Thatcher & James N. Brune* 473

Volcanics

Explosive volcanic eruption—I. The rate of fall of pyroclasts, *G. P. L. Walker, L. Wilson & E. L. G. Bowell* 377
